ARTUR BACHYNSKIY

FRONTEND DEVELOPER

ABOUT ME

I have been learning web development since 2021, after 8 months of studying I worked as a junior front-end developer, a year after learning the frontend I got interested in the backend, and until today I learn both frontend and full stack projects. I am ready to show my skills and potential.

EXPERIENCE

X-Inform | Ternopil, Ukraine
Junior Frontend Developer | Feb 2022 - Sep 2022

Development of database administration for quick search of registered residents, to identify utility debts.
In the role of a front-end developer, my main responsibilities were:

- Creating tables with a list of residents
- Simple routing and page navigation
- Implementation of CRUD operations with a list of users
